

ABRASIVE BLASTING PRODUCT RANGE

	PRODUCT APPLICATION	AVERAGE PROFILE RANGE	BLASTING RATES	CONSUMPTION RATE
<p>AG 20/40 MESH</p> <p>Coarse grade abrasive for heavy coatings and tough applications.</p>	<p>Removal of coatings 750µm+ (20mil)</p> <p>High build coating removal</p> <p>Removal of extreme rust</p> <p>Surface profile requirements of 85µm+</p> <p>Offshore, tanks and heavy marine</p>	85-105 µm	Up to 20m ² /hr	from 15kg/m ²
<p>AG 30/60 MESH</p> <p>Highly versatile abrasive for medium to thick coatings and general maintenance.</p>	<p>High performing general maintenance abrasive</p> <p>Removal of medium to heavy coatings</p> <p>Removal of medium to heavy rust</p> <p>Provides uniform surface profile for optimum coating adhesion</p>	60-90 µm	Up to 30m ² /hr	from 15kg/m ²
<p>AG 80 MESH</p> <p>High speed, low consumption abrasive, ideal for removing thin coatings and mill scale.</p>	<p>High speed, low consumption abrasive</p> <p>Removal of thin coatings and mill scale</p> <p>Removal of light rust</p> <p>Provides uniform surface profile for optimum coating adhesion</p>	40-60 µm	Up to 35m ² /hr	from 8kg/m ²
<p>AG 120 MESH</p> <p>High speed, precision abrasive, ideal for restoration and gentle cleaning.</p>	<p>High speed, low consumption abrasive</p> <p>Removal of dirt, graffiti and mill scale</p> <p>Stainless steel, aluminium and titanium surface preparation</p> <p>Glass etching</p>	20-45 µm	Up to 30m ² /hr	from 6kg/m ²

*Performance outcomes may vary based on surface blasted, application techniques, equipment type and settings, and operating conditions. Please speak with your local distributor about optimising the performance of Australian Garnet for your needs.

ABRASIVE BLASTING

PRODUCT RANGE

YOUR CHOICE OF GARNET MATTERS MORE THAN YOU THINK. CHOOSE GARNET FROM A PURE SINGLE SOURCE PRODUCTION.

FOUR REASONS TO CHOOSE AUSTRALIAN GARNET

PURITY

Supplied from a single high quality alluvial garnet source, providing consistent high quality and purity.

PRODUCT

Engineered to deliver optimized performance outcomes, meeting international standards and coating specifications.

PROCESS

State-of-the-art wet and dry processing plants produce a premium garnet with low chlorides, low dust and optimal particle sizing through stringent quality control.

PACKAGING

Premium color coded heavy duty packaging for safe handling and transport, and increased storage life.

AUSTRALIAN GARNET'S PROMISE

**RISK REDUCTION
EASIER ON
ASSETS AND
TRANSPORT**

**SUPERIOR
PERFORMANCE
TOUGH AND
ECONOMICAL**

**SAFER
FOR ALL
PEOPLE AND
THE PLANET**

**QUALITY
ASSURANCE
PRODUCTIVE
AND EFFICIENT**
