

120 MESH

PERFORMANCE

Focusing Tube	0.02in (0.51mm) - 0.03in (0.76mm)
Orifice	0.007in (0.18mm) - 0.01in (0.25mm)

PRECISION WATERJET ABRASIVE.

KEY PRODUCT FEATURES

Ideal for thinner, softer and more brittle materials

Consistent particle sizing that reduces downtime and maximises output

Good cutting speeds with a superior edge

PRODUCT APPLICATIONS

Marble

Brass

Glass

Plastics

Ceramics

PROPERTIES OF AUSTRALIAN GARNET

HIGH HARDNESS

Tougher grains that increases performance and reduce consumption.

HIGH DENSITY

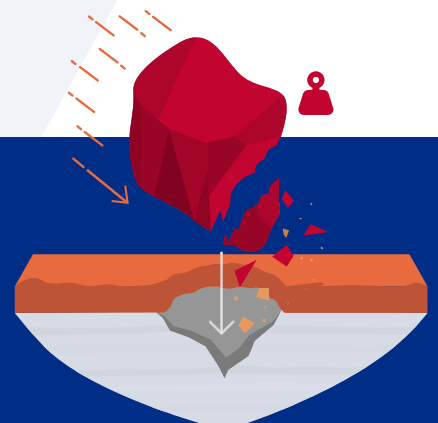

Increases cutting speed, gets the job done faster.

LOW FRIABILITY

Increases recyclability and reduces downtime.

SUB ANGULAR

Grains that produce a superior finish.

A SUPERIOR ALLUVIAL GARNET, AUSTRALIAN OWNED AND SOURCED, THAT CONSISTENTLY OUTPERFORMS ALTERNATE ABRASIVES.

INDUSTRY APPLICATION

- MANUFACTURING
- AEROSPACE
- METAL WORKS
- GLASS CUTTING
- STONE CUTTING

YOUR CHOICE OF GARNET MATTERS MORE THAN YOU THINK. CHOOSE GARNET FROM A PURE SINGLE SOURCE PRODUCTION.

Australian Garnet 120 Mesh premium abrasive is a waterjet cutting product, offering a high precision cut for thinner or more brittle material, delivering good cutting speeds and a superior edge finish. The superior mineral properties of alluvial garnet and Australian Garnet's state of the art wet and dry processing facilities delivers a premium abrasive with superior quality and performance.

FOUR REASONS TO CHOOSE AUSTRALIAN GARNET

PURITY

Supplied from a single high quality alluvial garnet source, providing consistent high quality and purity.

PRODUCT

Engineered to deliver optimized performance outcomes, meeting international standards and coating specifications.

PROCESS

State-of-the-art wet and dry processing plants produce a premium garnet with low chlorides, low dust and optimal particle sizing through stringent quality control.

PACKAGING

Premium color coded heavy duty packaging for safe handling and transport, and increased storage life.
